

Pilar Madariaga

A still life photograph featuring a wicker basket and two bowls filled with a mix of blueberries and red berries, possibly raspberries or strawberries, on a rustic wooden surface. The scene is framed by a white, hand-drawn style border. The text ".1. Exploratory Data Analysis" is overlaid in the center in a white, sans-serif font.

.1. Exploratory Data Analysis

Raw Data I

Variable Respuesta : Clase de arándano

	count	unique	top	freq	mean	std	min	25%	50%	75%	max

Variables Predictoras: Area, Eje Mayor, Eje menor, Excentricidad, Volumen Ratio, Perímetro

Raw Data II

Distribución No Normal

Missing Values

	Total	%
Area	39	5.416667
E mayor	34	4.722222
E menor	37	5.138889
Exc	44	6.111111
Vol	43	5.972222
Rat	40	5.555556
Perim	47	6.527778
Clase	0	0.000000

- Se observa un porcentaje pequeño de valores nulos distribuidos de manera no uniforme entre las diferentes columnas del dataset.
- Estrategia de tratamiento de valores faltantes: **Eliminación**

Skew and Kurtosis

Skewness es una medida que determina la **asimetría** de las colas.

	skew	kurtosis
Area	1.157159	1.059180
Emayor	0.870055	0.789054
Emenor	0.652404	0.423626
Exc	-1.390112	2.841782
Vol	1.127781	0.979255
Rat	-1.101462	3.244730
Perim	0.812233	0.693695

Kurtosis es una medida que determina la forma de la distribución, observando el pico y la pesadez de las colas (**tailedness**).

Outliers: IQR Method

Without Outliers I

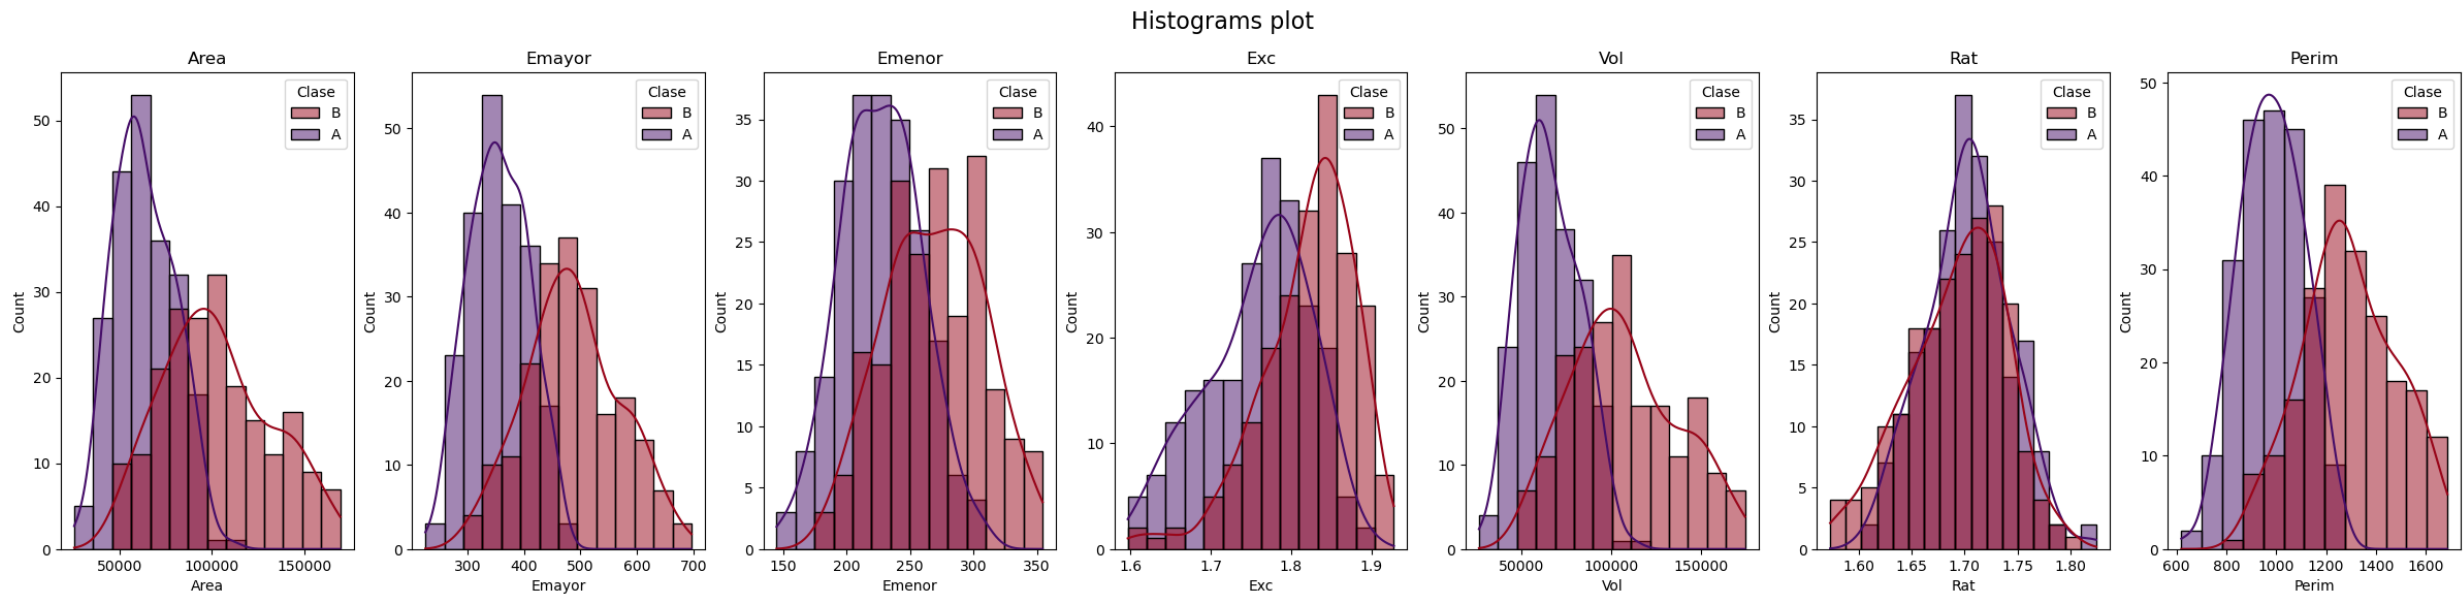

Anomalies: Isolation Forest

Deteccion de outliers con Isolation Forest

After cleaning

	skew	kurtosis
Area	0.769034	0.009354
Emayor	0.539407	-0.293369
